Helping Rozelle to Recover

The Rozelle and Lilyfield communities have experienced ongoing disruption resulting from State Government mega projects. The construction of the Westconnex interchange, the Iron Cove link, development in the Bays Precinct, and the Government's refusal to demolish the dangerous former Balmain Leagues Club site, have all caused damaging impacts to our community.

Inner West Council has fought hard to force the NSW Government and Transport for NSW to prepare plans for the revitalisation of Victoria Road and Darling Street post-Westconnex construction. Council and the community should have a say in this opportunity and Rozelle Town Centre's revitalisation.

We are asking you to join us in developing a master plan for Victoria Road, Darling Street and nearby streets and public spaces that reflect the community's views. We will use the master plan and community feedback to advocate to the State Government to deliver the real and permanent improvements to amenity in Rozelle that have been promised.

Message from the Mayor

For years now the State Government's treatment of Rozelle and Lilyfield has been marked by ineptitude and secrecy at every turn. For much of the past decade the Government's actions have neglected the people of our community in order to maximise the profits from the construction and sale of Westconnex.

This has added up to years of construction impacts and traffic chaos for the Inner West generally and the people of Rozelle and Lilyfield in particular.

The Government's most recent downgrading of the proposed sporting and recreation facilities in the long promised Rozelle Parklands is just the latest example of how our community has been taken for granted.

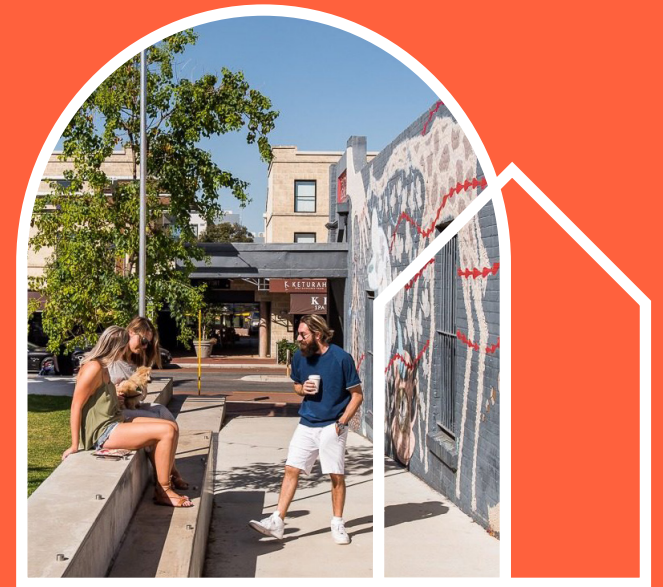

Inner West Council is fighting for the future of Rozelle Town Centre. We are committed to supporting local businesses and residents to recover from years of disruption and we want to know your vision for your local centre.
