Feedback closes on Sunday 5 May 2024.

# Let's take a dip

After years of advocacy, I am pleased to let you know that we are taking the next step in making the Callan Park Tidal Baths a reality for our community.

With its position at the heart of the Bay Run, the Callan Park Tidal Baths can become a Sydney Icon.

After exhaustive testing over a number of years, demonstrating the water quality is safe, Council is now seeking your input on the design and construction of this beautiful, place for families to gather.

We want this to be a facility that will be used and enjoyed by all our community including pedestrians, joggers, cyclists and families using the Bay Run.

Please let us know your views and priorities for the final design of the new Callan Park Tidal Baths.

Darcy Byrne,  
Inner West  
Mayor

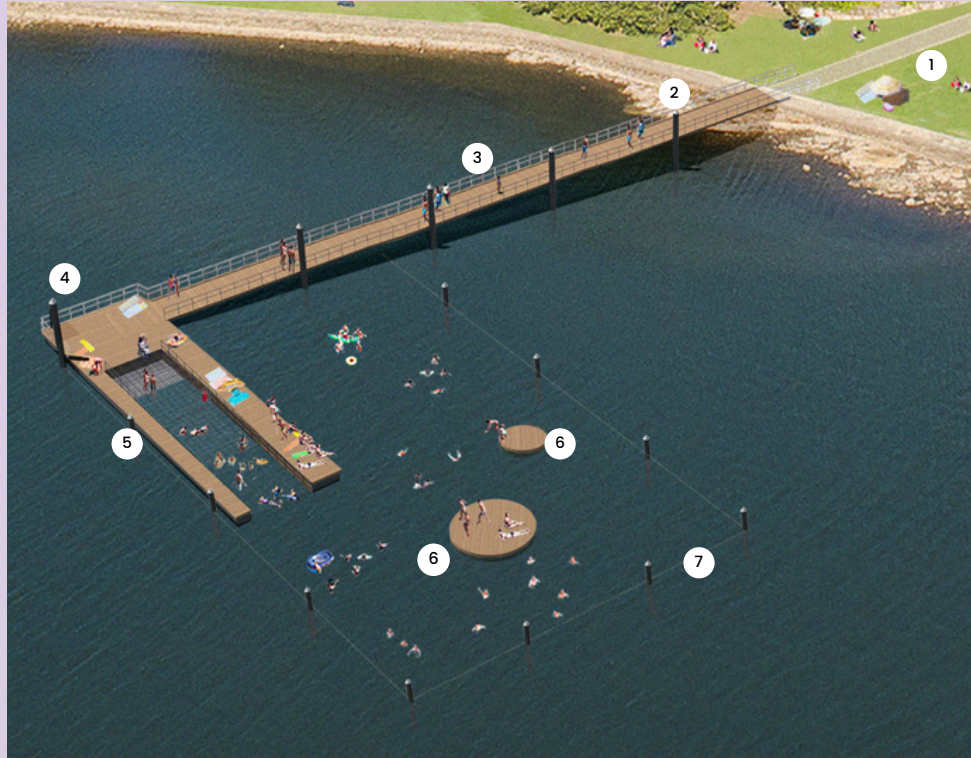

# New Callan Park Tidal Baths

INNER WEST

## Have your say on the concept design

## Features

1. Accessible pathway
2. Fixed jetty
3. Accessible pontoon walkway with handrails and balustrade
4. Pontoon with balustrade to external edges and potential shower
5. Accessible ramp with handrails – doubles as splash play zone
6. Play pontoon
7. Shark net

## About the project

We're building an iconic and picturesque place where the community can drop in for a dip after a walk or run on the Bay Run.

The design will deliver a family oriented recreational facility and provide safe, accessible swimming for the whole community.

A new accessible pathway at the site will integrate the swimming area with existing features of the parkland.

**Head online to let us know your thoughts on the concept design.**

## Water quality assurance

The approval process involved two years of extensive environmental impact research, river depth and floor quality testing. Water quality testing has been carried out since 2018 in collaboration with Sydney Water, NSW Government's Beachwatch and the Parramatta River Catchment Group.

Beachwatch monitoring equipment onsite will allow Council to establish real-time water quality notification using methods such as smart phone apps, hotlines and signage.
