

## Hot weather and you community survey results

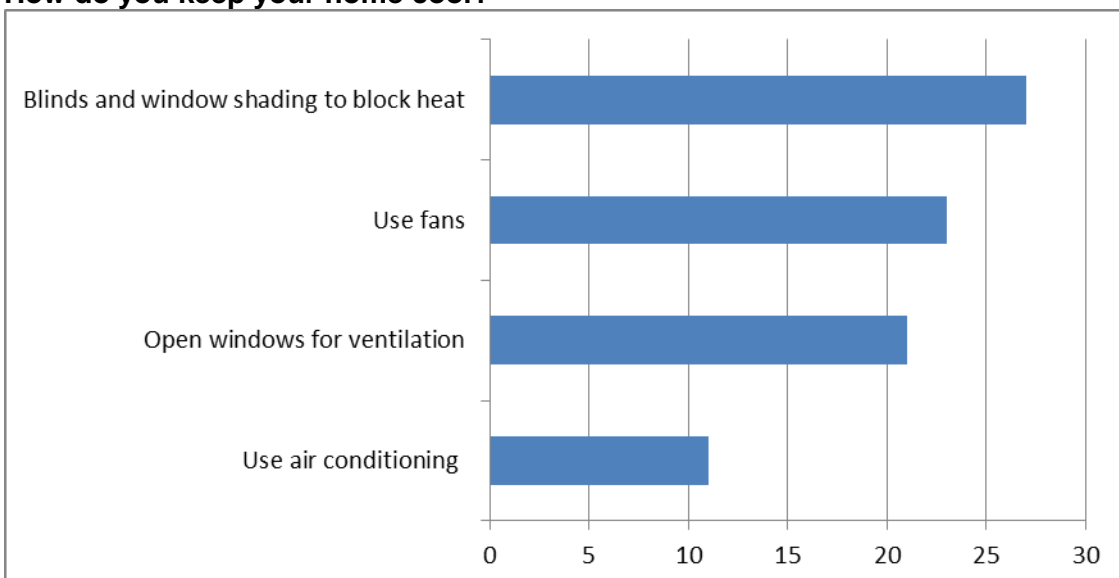

- Thirty six people completed the survey about hot weather and you. Most of these people were over 60 years old.
- Most people surveyed said they felt moderate to very much risk on very hot days when they were running errands/shopping, working outdoors and working indoors (with no air conditioning).

### Do you feel that your health is at risk on very hot days?

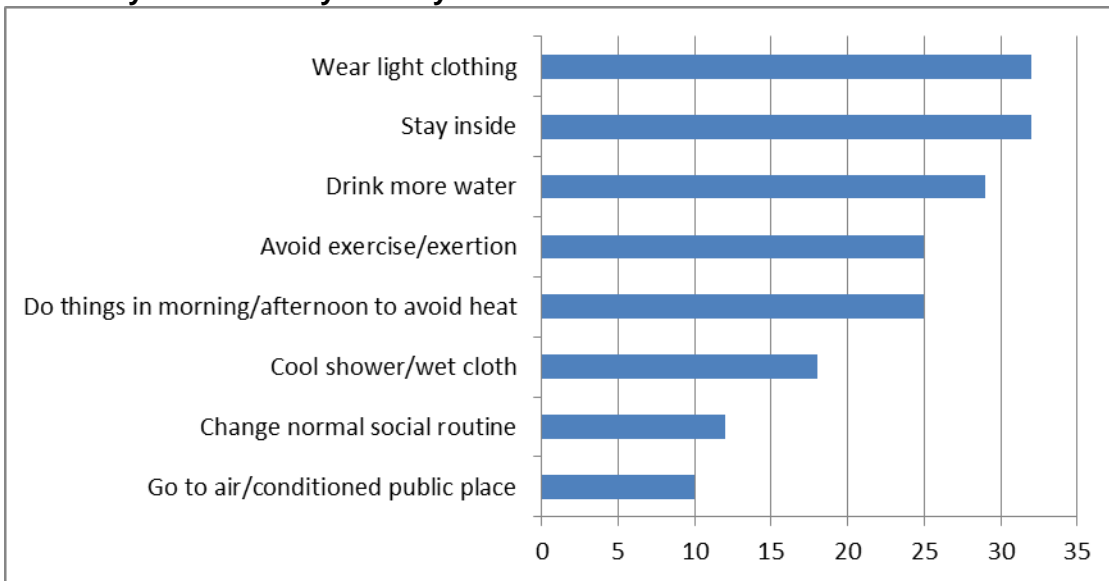

- About one-third of people surveyed use air conditioning to keep their homes cool, most favouring other measures like window shading, fans or opening windows.

### How do you keep your home cool?

- To keep cool on very hot days most people wear light clothing, stay inside, drink more water, avoid exercise/exertion or do things in the morning or afternoon to avoid the heat.

**What do you do on very hot days?**
